PROFESSIONAL SUMMARY

Results-driven Senior Product Manager with 10+ years of experience building AI-powered digital products, enterprise eCommerce platforms, marketplace solutions, healthcare portals, and fintech payment infrastructure across global brands and high-growth technology environments. Proven track record of owning complex products end to end — from ambiguous 0-to-1 problem spaces through successful market launch — delivering measurable outcomes: **63% improvement in net sales**, **15% digital revenue increase** through AI personalization, and **7% reduction in customer churn**. Deep expertise across Salesforce Commerce Cloud, Shopify, Magento, Mirakl, Elastic Path, Spryker, and VTEX — with hands-on AI/ML implementation, personalization engine delivery, and Generative AI product development. Equally strong across B2B, B2C, and B2B2C — and experienced delivering for enterprise, marketplace, healthcare, and consumer-facing platforms across retail, foodservice, financial services, healthcare, and media industries.

CORE COMPETENCIES

- Product Strategy, Vision & Roadmap Ownership
- eCommerce & Marketplace Platform Expertise
- Fintech, Payments & Card Product Development
- Cross-functional Leadership (Eng, Design, Data Science)
- Multi-sided B2B, B2C & B2B2C Platform Delivery
- Stakeholder Management & Executive Communication
- AI/ML & Generative AI Product Development
- Healthcare Portal & Clinical Workflow Products
- 0-to-1 Product Development & Go-to-Market
- A/B Testing & Conversion Rate Optimization
- Personalization Engines & Recommendation Systems
- Agile / Scrum / OKRs & Sprint Planning

TECHNICAL SKILLS

eCommerce Platforms: Salesforce Commerce Cloud (Demandware), Magento, Shopify, SAP Hybris, Adobe Experience Manager (AEM), VTEX, BigCommerce, Elastic Path, Drupal Commerce, Spryker, Mirakl

AI & Analytics: Machine Learning, Generative AI, LLMs, Personalization Engines, AI Recommendations, Prompt Engineering, Predictive Analytics, Google Analytics, Tableau, Power BI, SQL, Data Mining

Integration & Systems: PIM, OMS, ERP, CRM, Payment Gateways, Payment Lifecycle (Auth, Capture, Refund), Banking API Integration, REST API Design, AWS, Google Cloud, CI/CD, SDLC, Git

Product Tools: Jira, Confluence, Miro, Figma, Productboard, InVision, Balsamiq, Notion, Microsoft Visio

Dev Practices: Agile, Scrum, Waterfall-Scrum Hybrid, TDD, BDD, UAT, QA Automation, User Stories, Wireframes, Sprint Planning, OKRs

PROFESSIONAL EXPERIENCE

Product, Growth & Systems Consultant

Coach Pri — Product-with-Pri | March 2026 – Present

- Partnered directly with the founder to run product, growth, and systems initiatives for a coaching and digital education business, owning workflow design, funnel execution, and cross-platform operating improvements
- Created the systems and integrations strategy across Wix, Kajabi, Beehiiv, Zapier, and related tools, documenting lead sources, field mappings, source-of-truth logic, workflow gaps, and execution priorities; built Notion roadmap and timeline to sequence work across lifecycle email flows, lead capture, events, and growth workstreams

- Diagnosed and resolved an undocumented Zapier API incompatibility blocking automated lead capture across 9 Wix forms — restored full lead flow into Kajabi at \$0 cost with zero rebuilds (published case study: nilanjana281.github.io/github.io/pm-case-study.html)

Senior Product Manager

Born Group | July 2019 – September 2025

Select clients: Converse, Forever 21, Shoes.com, Lucky Brand, Playboy, Lindt, Oreo, Sour Patch Kids, Elémis, Delta Faucet, Boost Mobile, Sysco, Iron Mountain, Yamaha, CareAllies, Fairstone Financial

AI-Powered Products, Personalization & GenAI

- Spearheaded AI-powered personalization and omnichannel strategies across enterprise retail platforms for global brands — drove a **15% increase in digital revenue** by translating ML capabilities into targeted customer experiences validated through behavioral analytics and A/B testing
- Pioneered Generative AI-driven test case generation integrated into enterprise BDD/TDD and CI/CD workflows — one of the earliest production GenAI implementations in enterprise QA, improving edge-case coverage and accelerating delivery velocity
- Built a multi-provider AI agent from scratch (Claude, ChatGPT, Gemini APIs) — hands-on LLM prompt engineering, model output evaluation, structured JSON output design, and iterative optimization based on real usage data
- Collaborated with BI and data science teams to design A/B testing frameworks, analyze conversion funnels, and optimize checkout journeys — continuously feeding performance signals into roadmap prioritization

Enterprise eCommerce & D2C Platform Delivery

- Defined product vision and roadmaps for complex eCommerce re-platforming programs across Salesforce Commerce Cloud, Shopify, and Magento for global consumer brands including **Converse, Forever 21, Lucky Brand, Shoes.com, Playboy, Boost Mobile, and Delta Faucet** — aligning multi-million-dollar programs across B2B, B2C, and D2C channels
- Launched BOPIS (Buy Online, Pick-Up In Store) feature achieving **63% improvement in net sales**, 50% increase in local store inventory utilization, and **7% reduction in customer churn** YoY — owned end to end from customer discovery through post-launch performance measurement
- Managed comprehensive third-party integrations across PIM, OMS, ERP, CRM, payment gateways, and analytics platforms — ensuring seamless data flows across complex enterprise technology stacks for global brands
- Delivered AI-powered personalization and omnichannel strategies for CPG brands including **Lindt, Oreo, Sour Patch Kids, and Elémis** — translating customer behavioral data into product discovery and conversion improvements across digital storefronts

Marketplace & B2B Platform Products

- Led B2B marketplace platform delivery for **Sysco** on Mirakl — the largest US foodservice distributor — owning product requirements, vendor onboarding flows, and catalog management for a complex multi-sided B2B marketplace serving restaurants and institutions
- Delivered enterprise marketplace products for **Iron Mountain** on Spryker Marketplace and **ICC** on VTEX Marketplace — multi-sided platform experience across document management and institutional marketplace contexts
- Owned B2B distributor platform product for **Orgill** on Elastic Path + Vue Storefront — hardware and building supply distribution platform with complex dealer and wholesale ordering workflows
- Led manufacturer platform product for **Yamaha Music** on Magento — complex dealer network and B2B channel management for a global musical instrument brand

Healthcare Digital Products & Clinical Portals

- Served as embedded Product Manager for **CareAllies** (Cigna) — owned provider portal, claims portal, and caregiver portal end to end, managing full product lifecycle across regulated healthcare workflows with clinical, operations, and compliance stakeholders
- Delivered digital platform and workflow products for medical device clients — regulated IP and copyright workflow systems in compliance-sensitive environments with cross-functional clinical, legal, and engineering stakeholders

- Managed end-to-end UAT, QA planning, and clinical validation for healthcare platform releases — coordinating cross-team handoffs, documentation, and acceptance processes across regulated healthcare environments

Integration Architecture & Technical Product Design

- Designed end-to-end integration architecture and authored a full PRD for expanding a cross-border shipping, tax, and duty calculation platform from Shopify into Magento and Salesforce Commerce Cloud — covering HLD, API endpoint and payload design, checkout pipeline hooks, FX rate strategy, merchant onboarding (<5 days), and extended local payment processing for multi-currency international markets
- Defined platform-specific integration patterns across Shopify, Magento, and SFCC — mapping checkout API differences, middleware requirements, cartridge vs. module architecture, and payment gateway integration approaches to minimize implementation risk and accelerate time to market

Fintech, Payments & Financial Products

- Led development of payment gateway, card products, and installment payment structures for **Fairstone Financial**, a major Canadian consumer lending institution — owned full product lifecycle from requirements through market launch including banking API integration, card scheme design, and regulatory compliance
- Directed cross-functional teams on complex financial platform initiatives — managing scope, prioritization, and delivery timelines for mission-critical payment infrastructure with zero tolerance for error

Cross-functional Leadership & Stakeholder Management

- Collaborated with C-level stakeholders on annual business planning, quarterly OKRs, and product investment decisions — translating complex technical trade-offs into executive-ready strategic narratives that drove measurable outcomes
- Leveraged AWS and Google Cloud infrastructure to architect scalable, cost-efficient solutions supporting high-throughput transaction flows and distributed enterprise platform environments
- Mentored junior product professionals and cross-functional teams — establishing Agile frameworks, documentation practices, and customer-centric product thinking that improved team velocity and delivery quality

Product Owner

[Vlink Inc](#) | April 2017 – January 2018

- Conducted comprehensive Gap Analysis and Business Process Automation for enterprise financial services CRM — delivering strategic improvements across loan servicing and financial transaction platforms
- Developed detailed BRDs, FRDs, and Use Case Diagrams guiding successful multi-phase financial services transformation — applied data mining and statistical analysis to identify market trends, risk patterns, and customer behavior insights

Lead Business Analyst

[Nextworld Technologies](#) | August 2015 – March 2017

- Built Magento-based eCommerce platforms for emerging international markets — led full discovery cycle including customer research, competitive analysis, backlog planning, and delivery for consumer-facing digital commerce products
- Implemented Agile methodologies including JAD sessions, backlog grooming, and roadmap planning — ensuring alignment across technical and business stakeholders on complex global platform programs

Business Test Analyst

[CPA Global](#) | November 2011 – April 2013

- Developed QA frameworks and automated testing processes for enterprise applications — technical foundation directly informing how I approach AI model validation, edge-case coverage, and production readiness today

PORTFOLIO & PROJECTS

- **AI Manuscript Editor Agent** — Built a 0-to-1 multi-provider AI agent (Claude, ChatGPT, Gemini) with intelligent editorial feedback, chapter tracking, PDF/Word export, and a v2 roadmap covering persistent memory and NLP continuity. nilanjana281.github.io/github.io

- **Payments Lifecycle Integration Prototype** — Built a hands-on payments integration prototype demonstrating the full order transaction lifecycle: authorization, capture, cancellation, and refund. Used Postman for API testing and validation across transaction states, and CodePen for frontend payment widget integration — mapping user actions to backend behavior across distinct lifecycle stages.
- **Wix x Zapier x Kajabi Integration Case Study** — Diagnosed and resolved an undocumented legacy API incompatibility blocking automated lead capture at \$0 cost, zero rebuilds. Published publicly.

KEY ACHIEVEMENTS

- **63% net sales improvement & 7% churn reduction** — BOPIS eCommerce feature, owned end to end from customer discovery through post-launch measurement across enterprise retail
- **15% digital revenue increase** — AI-powered personalization platform across global consumer brands, driven by data science partnership and iterative behavioral optimization
- **Global brand portfolio** — delivered enterprise digital products for Converse, Forever 21, Sysco, Yamaha, Lindt, Oreo, Shoes.com, Lucky Brand, Playboy, Iron Mountain, and 20+ others
- **Multi-platform depth** — hands-on product ownership across Salesforce Commerce Cloud, Shopify, Magento, Mirakl, Elastic Path, Spryker, VTEX, Drupal — rare breadth in a single PM career
- **Healthcare portal PM for CareAllies (Cigna)** — provider, claims, and caregiver portals in a regulated clinical environment
- **Fintech payment infrastructure for Fairstone Financial** — payment gateway, card products, and installment structures for a major Canadian consumer lender
- **First-mover Generative AI in enterprise production** — shipped LLM-powered automation into CI/CD workflows; built multi-provider AI agents hands-on

EDUCATION & CERTIFICATIONS

MS in Business Analytics

Saint Peter's University

MBA in Management

IILM

BTech in Computer Engineering

Jaipur Engineering College

CSPO — Certified Scrum Product Owner | **CCBA** — Certification of Competency in Business Analysis
