Senior Product Manager | AI Products | Enterprise Platforms | Commerce | Healthcare | Fintech

PROFESSIONAL SUMMARY

Senior Product Manager with 10+ years building AI-powered, platform, and digital commerce products across enterprise eCommerce, marketplace, healthcare, and fintech — in regulated, multi-stakeholder environments where integration complexity and delivery accuracy are non-negotiable. Track record of measurable outcomes: 63% net sales lift through BOPIS, 15% digital revenue growth through AI personalization, 30% category visibility improvement through navigation redesign, and 7% churn reduction. Combines product vision and GTM strategy with hands-on technical depth across LLMs, APIs, and enterprise systems — including independently shipping a production multi-model AI agent using Claude, ChatGPT, and Gemini.

PROFESSIONAL EXPERIENCE

Senior Product Manager | *Product with Pri* | March 2026 – Present

Sole product owner for a digital education business — built product strategy, GTM systems, and lead-to-conversion funnel architecture from scratch across a multi-platform stack (Wix, Kajabi, Beehiiv, Zapier) with no prior documentation, process, or engineering support.

- Designed lead-to-conversion system architecture across Wix, Kajabi, Beehiiv, and Zapier — defined source-of-truth data flows, field mappings, and segmentation logic; built product roadmap covering lifecycle email, lead capture, events, and growth workstreams; pipeline restoration drove 8% engagement improvement.
- Diagnosed and resolved an undocumented Zapier API incompatibility blocking lead capture across all 9 Wix forms — identified legacy trigger string issue unresolved by four AI tools (Claude, ChatGPT, Grok, Gemini), restored full pipeline at \$0 with zero rebuilds, and published the fix as a case study.
- Translated ambiguous founder goals into structured PRDs, acceptance criteria, and integration specs — establishing product decision infrastructure where none existed across a greenfield environment.
- Independently designed, built, and shipped a multi-model AI Manuscript Editor using Claude, ChatGPT, and Gemini — owning product design, prompt engineering, structured JSON output, and model evaluation; identified and resolved a silent-degradation trust problem in long-form AI workflows, driving a trust-first design approach around bounded authority and change visibility.

Senior Product Manager | *Born Group* | July 2019 – September 2025

Led product programs for 11 enterprise clients across eCommerce, marketplace, healthcare, and fintech — owning discovery, user research, GTM, launch, and post-launch optimization. Clients: CareAllies (Cigna), Fairstone Financial, Sysco, Converse, Forever 21, Boost Mobile, Iron Mountain, Yamaha, Orgill, Lucky Brand, Lindt.

Enterprise eCommerce, Marketplace and Integration Architecture

- Defined product vision, GTM strategy, and roadmaps for replatforming programs across SFCC, Shopify, and Magento — led product discovery, user research, customer journey mapping, and feature prioritization for global brands across B2B, B2C, and D2C channels.
- Built the first VTEX marketplace for ICC from 0 to 1 — authored all foundational documentation covering architecture, merchant onboarding, catalog management, and multi-seller workflows; this implementation set the standard for subsequent VTEX deployments.
- Led B2B marketplace delivery for Sysco on Mirakl — owned vendor onboarding, catalog taxonomy, and pricing logic for a multi-sided marketplace in a high-complexity food distribution supply chain.
- Authored technical PRDs and API specifications for enterprise integration architecture spanning PIM, OMS, ERP, CRM, payment gateways, and analytics — defining data contracts and system-of-record logic across stacks with 5–10 integrated platforms.

AI Products, Personalization and Generative AI

- Led AI personalization strategy across enterprise retail platforms — drove 15% digital revenue growth through ML-enabled recommendation systems; challenged the team to shift measurement from CTR to add-to-cart rate and downstream conversion, directly changing what the model optimized for and making the revenue impact traceable.
- Pioneered GenAI-driven test case generation within BDD/TDD and CI/CD workflows — improved edge-case coverage and reduced QA cycle time across multiple concurrent delivery programs.
- Partnered with data science and BI teams to design A/B experimentation frameworks, define north star metrics, and translate conversion funnel analysis into roadmap prioritization decisions.

Omnichannel Retail and In-Store Digital

- Owned the full BOPIS lifecycle from discovery through post-launch optimization — drove 63% net sales improvement, 50% increase in local inventory utilization, and 7% YoY churn reduction; made the call to descope real-time inventory sync in phase one, accepting near-real-time as interim to ship on time without sacrificing accuracy.
- Integrated RFID inventory signals into digital storefronts — enabled real-time store availability and customer reservation flows, closing the physical-digital inventory gap.

Search, Navigation and Discovery

- Owned search and discovery product strategy across enterprise digital commerce platforms — defined relevance models and ranking signals in Elasticsearch, implemented faceted navigation and catalog taxonomy across SFCC, Shopify, and Magento.
- Led a six-phase category navigation redesign delivering 30% improvement in category visibility and 18% increase in overall engagement.
- Delivered site-search UX improvements — typeahead, zero-results recovery, synonym expansion, and boosting rules — validated through A/B testing across high-traffic retail platforms.

Healthcare, Fintech and Stakeholder Leadership

- Led product delivery for CareAllies (Cigna) — owned provider portal, claims management, and caregiver portal across HIPAA-regulated healthcare workflows.
- Led payment gateway, card product, and installment-payment initiatives for Fairstone Financial — authored PRDs for banking API integrations, managed regulatory constraints, and coordinated production deployment in a live financial services environment.
- Collaborated with C-level stakeholders on annual planning, P&L, OKRs, and investment prioritization — translated technical trade-offs into executive business cases including cost-benefit analysis and ROI framing.

Product Owner | Vlink Inc | April 2017 – January 2018

- Conducted gap analysis and scoped business-process automation opportunities for enterprise financial-services CRM platforms — identified inefficiencies in workflows supporting loan origination, customer onboarding, and case management.
- Developed PRDs, BRDs, FRDs, and use-case documentation supporting multi-phase digital transformation programs in regulated financial services.

Lead Business Analyst | Nextworld Technologies | August 2015 – March 2017

- Led product discovery, competitive analysis, backlog planning, and end-to-end delivery for Magento-based eCommerce platforms targeting emerging international markets.
- Established Agile delivery practices including JAD sessions, backlog grooming, sprint planning, and roadmap management across multiple concurrent programs.

Business Test Analyst | CPA Global | November 2011 – April 2013

- Developed QA frameworks and automated testing processes for enterprise applications, building the foundation for production-readiness discipline across UAT, edge-case coverage, and validation.

KEY ACHIEVEMENTS

- 63% net sales improvement, 50% inventory utilization increase, and 7% YoY churn reduction through BOPIS — including a phased rollout strategy and a key descope decision that enabled on-time launch.
- 15% digital revenue growth through AI personalization strategy — ML-enabled segmentation, recommendation systems, and A/B-tested experimentation across global consumer brands.
- 0-to-1 VTEX marketplace launch for ICC — built the platform from scratch and set the documentation and architecture standard for all subsequent implementations.
- Delivered regulated product programs in HIPAA-governed healthcare (CareAllies/Cigna) and live financial services (Fairstone Financial) — maintaining compliance, UAT rigor, and high-reliability production deployments.
- Independently shipped a multi-provider AI agent integrating Claude, ChatGPT, and Gemini — sole owner of product design, prompt architecture, model evaluation, and structured JSON output system.
- Owned search, navigation, and discovery strategy at 20+ enterprise brands — Elasticsearch relevance tuning, faceted navigation, PLP/PDP optimization, and a six-phase category redesign delivering 30% category visibility improvement and 18% engagement lift.

PORTFOLIO AND PROJECTS

- **AI Manuscript Editor Agent:** Multi-model AI agent (Claude, ChatGPT, Gemini) with structured editorial feedback across prose, scene structure, character authenticity, and emotional impact — with chapter tracking, side-by-side review, and export; built trust-first architecture addressing silent-degradation in long-form AI workflows. Full case study: nilanjana281.github.io/github.io
- **Payments Lifecycle Integration Prototype:** End-to-end payments workflow prototype covering authorization, capture, cancellation, and refund states — built with Postman for API validation and connected to a frontend widget for full lifecycle demonstration.

- **Wix x Zapier x Kajabi Integration Fix:** Diagnosed and resolved an undocumented API incompatibility that blocked lead capture across 9 forms — full funnel restoration at \$0 cost through root-cause analysis alone, no rebuild required.

CORE COMPETENCIES

AI and Machine Learning: AI/ML Product Delivery, LLMs, Generative AI, RAG, Prompt Engineering, Model Evaluation, Agentic Workflow Design, Personalization Engines, Recommendation Systems, A/B Testing, Experimentation Frameworks, OpenAI, Anthropic Claude, ChatGPT, Gemini

Search and Discovery: Elasticsearch, Search Relevance Tuning, Faceted Navigation, Algorithmic Ranking, Query Optimization, PLP/PDP Optimization, Search UX, Typeahead, Synonym Expansion

Omnichannel and Commerce: BOPIS, RFID Integration, Unified Inventory, SEO, Generative Engine Optimization (GEO), Cross-Channel Journey Design, Checkout Optimization, Ship-from-Store, Endless Aisle

Platforms and Integrations: SFCC, Shopify, Magento, Mirakl, Elastic Path, Spryker, VTEX, SAP Hybris, BigCommerce, PIM, OMS, ERP, CRM, Payment Gateways, REST APIs

Product Leadership: 0-to-1 Product Development, GTM Strategy, Product Discovery, User Research, Journey Mapping, Feature Prioritization, Roadmaps, OKRs, KPIs, Stakeholder Management, Agile/Scrum, Cross-functional Leadership

Domains: Enterprise eCommerce, Marketplace Platforms, Healthcare Portals, Fintech and Payments, Enterprise SaaS, B2B, B2C, B2B2C

TOOLS AND TECHNICAL SKILLS

Analytics and Data: Google Analytics, Mixpanel, Amplitude, Tableau, Power BI, SQL, Cohort Analysis, Funnel Analysis, User Segmentation, A/B Testing

Integration and Architecture: REST API Design, Payment Lifecycle, Banking APIs, AWS, Google Cloud, CI/CD, SDLC, Git

Product Tools: Jira, Confluence, Miro, Figma, Productboard, InVision, Balsamiq, Notion, Microsoft Visio

Delivery and Documentation: Agile/Scrum, Sprint Planning, Backlog Grooming, User Stories, Epics, Acceptance Criteria, Definition of Done, UAT, QA Automation, PRD, BRD, FRD, TDD, BDD

EDUCATION AND CERTIFICATIONS

MS Business Analytics — Saint Peter's University

MBA in Management — IILM

BTech Computer Engineering — Jaipur Engineering College

Certifications: CSPO (Certified Scrum Product Owner) | CCBA (Certification in Business Analysis)
